

# threatvine

SMART, SECURE NETWORKS  
OF CONNECTED PEOPLE

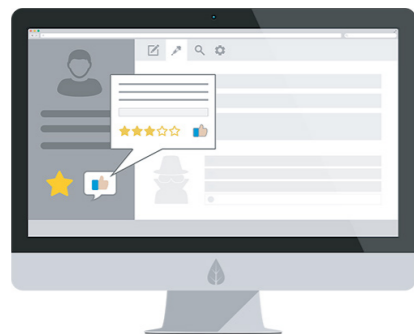

**SUREVINE**

## SECURE INFORMATION SHARING

Cyber-security information sharing platform designed for secure cross-organisational collaboration and collaborative intelligence analysis.

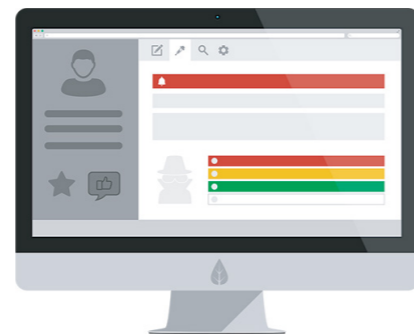

*“Secure Facebook for cyber threats”*

### FINANCIAL TIMES

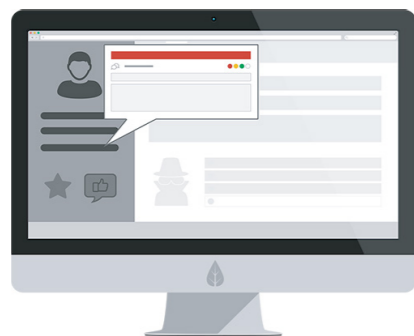

#### COMMUNITY

Build your network of trusted members to enable sharing by default

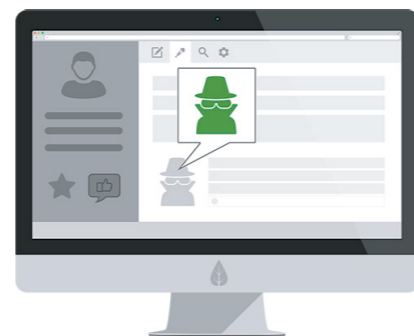

#### INFORMATION HANDLING

Industry recognised information handling e.g. Traffic Light Protocol, to control sharing

#### INCIDENT REPORTING

Quick and efficient sharing through structured data

#### ANONYMITY

Allows for Anonymous, but trusted, contributions

*“One of the UK’s leading cyber security companies”*

DAVID CAMERON, BRITISH PRIME MINISTER

Help create and be part of a trusted community of experts working together to keep one step ahead of the cyber threat.

#### A SINGLE ORGANISATION

May have good situational awareness of their network  
 Poor awareness of new, emerging threats  
 Expensive and time consuming to try and track it all individually

#### A COLLECTION OF ORGANISATIONS, A TRUSTED COMMUNITY

Share awareness from ALL networks/sectors  
 Focus on what is important  
 And how to protect against it

### BENEFITS

- Securely share outside the walled garden of your organisation
- Helps your supply chain to work together to defend themselves against threats
  - Advance warning of potential threats
- Understand issues that affect other organisations, including cross-sector
  - Share knowledge and skills to help other organisations
- Joins up your organisations and individuals simply, as/when you need to
  - Knowledge sharing, from threat analysts to network defenders

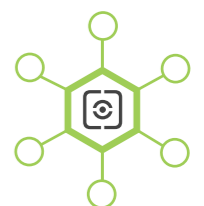

#### Private nodes

to share and enrich information

#### Open nodes

to discuss general topics

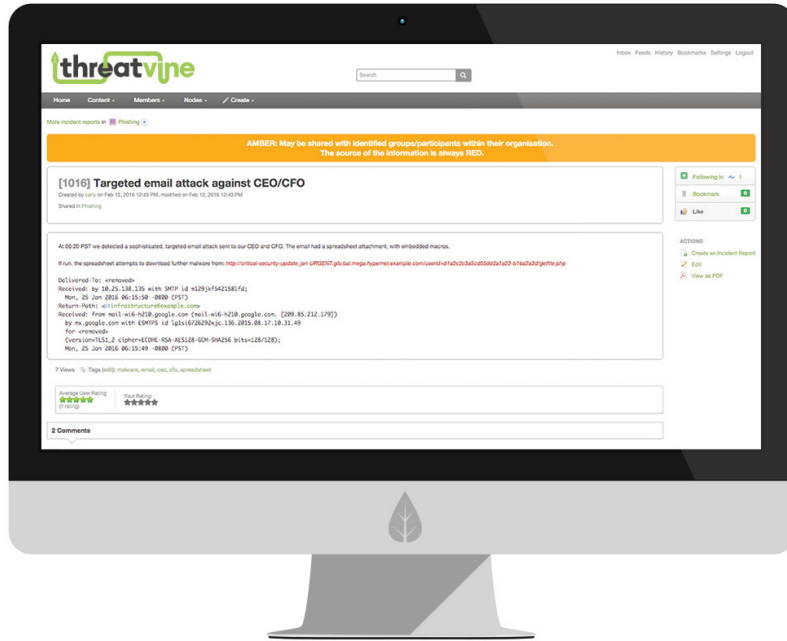

#### Focused nodes

for specific events, such as sporting events

Our own smart Research and Development and customer sponsored R&D into collaboration technology delivers constant **innovation**, building **products** born out of genuine user needs.

Available as SaaS and On Premise
